Chairman's Statement

On behalf of the Board of Directors, I am pleased to present the Annual Report and Audited Accounts of the Company and the Group for the financial year ended 31 March 2006.

RESULTS

The Group recorded a 23% increase in revenue to RM27.7 million for the year as against RM22.5 million in the previous year. A lower pretax loss of RM3.3 million was incurred for the year against RM6.6 million previously.

The reduction in pretax loss was due mainly to the discontinuation of our general moulding activities which had been unprofitable, as well as the implementation of cost cutting measures and increased efficiency.

The Company reported a loss before taxation of RM11.8 million for the current financial year compared to a profit before taxation of RM0.17 million in the previous financial year. The current year loss was mainly due to the impairment of investment in subsidiary company amounting to RM11.9 million.

REVIEW OF OPERATIONS

During the 2006 financial year, the Group's wood-based manufacturing division continued to face problems of escalating raw material price and soft selling prices for its products which largely remained stagnant or improved only marginally. However, the division managed to increase its revenue by approximately 25% to RM26.1 million compared to RM20.8 million in the previous financial year.

Maicador Sdn. Bhd. ("MDR") continued to focus on door production mainly for the export markets. Backed by higher revenue and cost cutting measures, MDR has returned to the black and managed to post a marginal profit of RM0.483 million for the 2006 financial year.

The performance of Maica Wood Industries Sdn. Bhd. ("MWI") which produces rubber wood laminated boards and round bars as well as Tropical Wood Mouldings has not been satisfactory due primarily to the escalating costs of rubber wood and tropical wood materials while increases in selling prices for our Group's products were slow and marginal due to intense competition. As a result of continuing losses, MWI ceased its production of Tropical Wood Mouldings during the year. Nevertheless, revenue for MWI increased by approximately 35% compared to previous financial year due to higher production and higher sales of rubber wood products. As a result, MWI managed to reduce its loss before tax by approximately 40% compared to the previous financial year.

Chairman's Statement

REVIEW OF OPERATIONS

In July 2006, the Board together with the Management of MWI have carefully assessed the viability of continuing with the production of its rubber wood products. Given the prevailing market conditions, the rapid increases in raw material costs, the high labour cost and intense competition depressing selling prices, the Board held the view that MWI's business was no longer viable. After due consideration, the Board took the painful decision to close the entire business operations of MWI by November 2006.

PROSPECTS

For the 2007 financial year, the Group will focus on the manufacturing and sales of engineered doors and will find ways to add more product lines. The Group will carry out more pro-active marketing approach to further increase the sales revenue and production output in order to reduce unit production cost.

The performance of 2007 financial year will be affected by the costs associated with the cessation of business in MWI. However, with the above actions in place, we are optimistic that the operating performance of the Group will gradually improve.

CORPORATE DEVELOPMENTS

On 20 July 2005, the Securities Commission granted its approval for the Company to utilise part of the proceeds amounting to RM10.576 million out of total cash consideration of RM41.344 million received from the disposal of Maica Laminates Sdn Bhd and Maica Corporation Sdn Bhd.

As at 30 June 2006, the Group has utilised a total of RM5.139 million from the said proceeds in the following manner:

	Approved Utilisation RM'000	Utilised as at 30 June 2006 RM'000	Balance Unutilised RM'000
Working Capital	6,376	1,282	5,094
Repayment of Overdraft	3,200	2,857	343
Repayment of Revolving Credit	1,000	1,000	0
Total	10,576	5,139	5,437

DIVIDEND

The Board of Directors does not recommend any dividend for the financial year ended 31 March 2006.

APPRECIATION

On behalf of the Board, I would like to extend our appreciation to the Management and Staff for their efforts, commitment and contribution. I would also like to express my sincere appreciation to our valued customers, business associates and shareholders for their continued support and confidence.

2 Financial risk management objectives and policies

The activities of the Group expose it to certain financial risks, including interest rate risk, credit risk, market risk, foreign currency exchange risk, liquidity and cash flow risk. The overall financial risk management objective of the Group is to create value for its shareholders by minimising the potential adverse impact of these risks on its financial position, performance and cash flows. Financial risk management is carried out through risk review, internal control systems and adequate insurance programmes.

(i) Interest rate risk

The Group's exposure to interest rate risk is minimal.

(ii) Credit risk

The Group's exposure to credit risk arises mainly from cash deposits with financial institutions and receivables, which consist mainly of bills receivables. For sales made on deferred credit terms, adequate assessment of counter party's financial standing is carried out before sales are made. The Group manages its exposure to credit risk by seeking to invest cash assets safely and profitably. The Group considers the risk of material loss on cash deposits with financial institutions to be unlikely.

(iii) Market risk

The Group's exposure to market risk is minimal as the selling prices of its products are fixed above the costs of its key raw materials.

2 Financial risk management objectives and policies (cont'd)

(iv) Foreign currency exchange risk

The Group's exposure to foreign currency exchange risk is mainly in respect of the foreign currency transactions entered into by the Company and its subsidiary company in US Dollar. The Groups' exposure to foreign currency exchange risk is partly reduced by the natural hedge of import and export. The Group also monitors the movements of the exchange rate and acts accordingly to further minimise its foreign currency exchange risk.

(v) Liquidity and cash flow risk

The Group practises prudent liquidity risk management to minimise the mismatch of financial assets and liabilities through an adequate amount of committed banking facilities and aims to maintain sufficient liquidity and cash flow at all times.

3 Basis of preparation of the financial statements

The financial statements of the Group and of the Company have been prepared under the historical cost convention (as modified by the revaluation of certain property, plant and equipment) unless otherwise indicated in this summary of significant accounting policies.

The financial statements comply with the provisions of the Companies Act, 1965 and the MASB approved accounting standards in Malaysia.

With effect from 1 April 2005, the financial statements of the Group and the Company adopt the new name of the approved accounting standards in Malaysia, that is, Financial Reporting Standards ("FRS"), in place of the MASB Standards.

4 Summary of significant accounting policies

All significant accounting policies set out below are consistent with those applied in the previous financial year unless stated otherwise.

(a) Basis of consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiary companies made up to the end of the financial year. Subsidiary companies are those companies in which the Group has power to exercise control over the financial and operating policies so as to obtain benefits from their activities.

Subsidiary companies are consolidated from the date on which control is transferred to the Group and is no longer consolidated from the date that control ceases. Intra-group transactions, balances and unrealised profits or losses are eliminated fully on consolidation and the consolidated financial statements reflect external transactions only.

Minority interest is measured at the minorities' share of the post acquisition fair values of the identifiable assets and liabilities of the acquiree. Separate disclosure is made of minority interest.

4 Summary of significant accounting policies (cont'd)

(b) Property, plant and equipment

Property, plant and equipment except for certain land, buildings, plant and machinery are stated at historical cost less accumulated depreciation and impairment losses.

Certain land, buildings, plant and machinery are stated at revalued amounts, based on valuations carried out by independent professional valuers, Government valuers and Directors, less accumulated depreciation.

Freehold land is not depreciated.

Long term and short term leasehold land are amortised in equal instalments over the periods of the respective leases ranging from 60 to 87 years, expiring in years 2041 to 2082.

Depreciation of other property, plant and equipment, except for spare parts and loose tools, is calculated on the straight line basis so as to write off the cost or valuation of the property, plant and equipment over their estimated useful lives at the following annual rates:

	%
Buildings	2
Renovation	20
Plant and machinery	5 - 10
Furniture, fittings and equipment	10 - 20
Motor vehicles	20

Initial purchases of spare parts and loose tools have been capitalised and depreciated at annual rates ranging from 20% to 100%. Subsequent purchases of such items have been charged out directly to the income statement.

The land, buildings, plant and machinery have not been revalued since the dates of the revaluation exercises as stated in note 17. The Directors have adopted the transitional provision of International Accounting Standard FRS 116: Property, Plant and Equipment as adopted by Malaysian Accounting Standards Board ("MASB") in respect of assets carried at previously revalued amounts to retain the carrying amounts of these land, buildings, plant and machinery on the basis of their previous revaluation subject to the continuing application of the current depreciation policy.

Surpluses arising on revaluation are credited to the revaluation reserve. Any deficit arising from revaluation is charged against the revaluation reserve to the extent of a previous surplus held in the revaluation reserve for the same asset. In all other cases, a decrease in carrying amount of the assets arising from revaluation is charged to the income statement.

Gains and losses on disposals are determined by comparing proceeds with carrying amount and are included in the income statement. On disposal of revalued assets, amounts in revaluation reserve relating to those assets are transferred to retained earnings.

4 Summary of significant accounting policies (cont'd)

(b) Property, plant and equipment (cont'd)

At each balance sheet date, the Group assesses whether there is any event or change in circumstances, which indicate that the carrying amount of the asset may not be recoverable. Whenever the carrying amount of an asset exceeds its recoverable amount, an impairment loss is recognised in the income statement immediately. The recoverable amount is the higher of an asset's net selling price and value in use. The net selling price is the amount obtainable from the sale of an asset at arm's length transaction. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. For an asset that does not generate largely independent cash flows, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

Impairment loss is reversed when there has been a change in the estimates used to determine the asset's recoverable amount, which causes an increase in the recoverable amount. Reversal of impairment loss is recognised to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation and amortisation, had no impairment loss been recognised. Reversal of impairment loss is recognised in the income statement.

(c) Subsidiary companies

Investments in subsidiary companies are stated at cost. Where an indication of impairment exists, the carrying amount of the investment is assessed and written down immediately to its recoverable amount.

(d) Associated companies

The Group treats as associated companies, those companies in which a long term equity interest of between 20% and 50% is held or where it is in a position to exercise significant influence over the financial and operating policies.

The Group's share of profits less losses of associated companies is included in the consolidated income statement and the Group's share of post-acquisition retained profits and accumulated losses are added to or deducted from the cost of investments in the consolidated balance sheet respectively.

In the Company's financial statements, investments in associated companies are stated at cost. Where an indication of impairment exists, the carrying amount of the investment is assessed and written down immediately to its recoverable amount.

(e) Investments

Quoted investments are stated at the lower of cost and market value. Other investments are stated at cost less allowance for diminution in value. Cost is determined principally on an average basis, computed on the occasion of each acquisition. Allowance for diminution in value is made only if, in the opinion of the Directors, there has been a permanent fall in the value of the investment. Profits or losses realised on sale of investments are taken to the income statement.

4 Summary of significant accounting policies (cont'd)

(f) Inventories

Inventories are stated at the lower of cost and net realisable value after adequate allowance has been made for all deteriorated, damaged, obsolete or slow-moving inventories. In general, cost is determined on the first in first out basis. Cost of raw materials and consumables comprise all costs of purchases and other incidental costs in bringing the inventories to their present location and condition. In the case of work in progress and finished goods, cost consists of cost of raw materials, direct labour and an appropriate proportion of factory overheads.

(g) Receivables

Receivables are carried at invoiced amounts less an allowance made for doubtful debts based on a review of all outstanding amounts at year end. Bad debts are written off when identified.

(h) Employee benefits

(i) Short term employee benefits

Wages, salaries, paid annual leave, bonuses and non-monetary benefits are accrued in the period in which the associated services are rendered by the employees of the Group.

(ii) Defined contribution plan

The Group's contributions to the Employees Provident Fund, the national defined contribution plan are charged to the income statement in the period to which they relate. Once the contributions have been paid, the Group has no further payment obligations.

(iii) Defined benefit plan

The Group operates an unfunded final salary defined benefit plan for its employees. The liability in respect of the defined benefit plan is the present value of the defined benefit obligations at the balance sheet date adjusted for actuarial gains/losses and past service cost. The defined benefit obligations are assessed using the projected unit credit method. Under this method, the cost of providing defined benefit obligations are charged to the income statement so as to spread the regular cost over the service lives of the employees in accordance with the advice of qualified actuaries who carry out a full valuation of the plan every three years. The Group determines the present value of defined benefit obligations with sufficient regularity such that the amounts recognised in the financial statements do not differ materially from the amounts that would be determined at the balance sheet date. The last actuarial valuation was carried out as at 31 March 2005.

Actuarial gains and losses are amortised over the period of three years on the straight line basis.

4 Summary of significant accounting policies (cont'd)

i) Income taxes

Current tax expense is determined according to the tax laws of each jurisdiction in which the Group operates and includes all taxes based upon the taxable profits, including withholding taxes payable by a foreign subsidiary company or associated company on distributions of retained profits to companies in the Group, and real property gains taxes payable on disposal of properties.

Deferred taxation is provided in full, using the liability method, on temporary differences arising between the amounts attributed to assets and liabilities for tax purposes and their carrying amounts in the financial statements unless the temporary differences arise from initial recognition of an asset or liability in a transaction which is not a business combination and at the time of the transaction, affects neither accounting profit nor taxable profit.

Deferred tax is recognised on temporary differences arising from investment in subsidiary companies and associated companies except where the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates that have been enacted or substantially enacted by the balance sheet date. Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which the deductible temporary differences or unused tax losses can be utilised.

(j) Cash and cash equivalents

Cash and cash equivalents comprise cash and bank balances, demand deposits, bank overdrafts and short term highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

(k) Revenue recognition

Revenue from sales of goods is recognised upon delivery of products.

Income earned in respect of financing of leases and hire-purchase is recognised using the sum-of-digits method while interest income earned on factoring is recognised on the straight line method.

Dividend income is recognised when the shareholder's right to receive payment is established.

Rental income is recognised on an accrual basis.

Interest income is recognised on the accrual basis determined by the principal outstanding and rate applicable.

The principal closing rates used in translation of foreign currency amounts are as follows:

(m) Financial instruments

(i) Financial instruments recognised on the balance sheet

The particular recognition method adopted for financial instruments recognised on the balance sheet is disclosed in the individual policy statements associated with each item.

(ii) Fair value estimation for disclosure purposes

The face values, less any estimated credit adjustments, for financial assets and liabilities with a maturity of less than one year are assumed to approximate their fair values.

The carrying amounts of floating interest rate financial liabilities with maturity of more than one year are assumed to approximate their fair values.

16 Deferred taxation

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when the deferred taxes relate to the same tax authority.

Deferred tax assets are not recognised for deductible temporary differences in respect of which the Directors are of the opinion that it is not probable that the Company and its subsidiary company will be able to generate sufficient future taxable profits against which the deductible temporary differences can be utilised.

The movements during the financial year relating to deferred taxation are as follows:

	Group	
	2006	2005
	RM'000	RM'000
As at 1 April/31 March	25	25

The above deferred tax liability is in respect of the taxable temporary differences between the carrying amount and tax base of the revalued freehold land of RM512,784 at the minimum real properties gains tax rate of 5%.

The net temporary differences for which no deferred tax assets are recognised in the financial statements are as follows:
